

PRANAV THORAT

B.Tech CSE · AI&ML · 2028 | PCCOE, Pune  +919021554871  pranavthorat4938@gmail.com  github.com/Pranav-cosmos

 <https://www.linkedin.com/in/pranav-thorat-p67/>  Pune, MH

EDUCATION

Pimpri Chinchwad College of Engineering

B.Tech — CSE (AI&ML) | 2024 – 2028

- JEE-Main: 95%ile | MHT-CET: 97.5%ile

Vidya Valley North Point

XII Science — HSC | 2022–2024 | 81.33%

PriyadarshaniEnglishMediumSchool

SSC Maharashtra | Till 2022 | 90.60%

TECHNICAL SKILLS

Languages:	Python, C, C++, HTML, CSS, Javascript
ML/DL:	PyTorch · Scikit-learn · HuggingFace
AI/NLP:	RAG · Hybrid Retrieval · Cross-Encoder · XGBoost
Data:	Pandas · NumPy · Matplotlib · Feature Eng.
Tools:	GitHub · Jupyter · Codecademy

CERTIFICATIONS

Codecademy

Online Learning Platform

- Creating AI Apps using Retrieval-Augmented Generation (RAG)
- Getting Started with Python for Data Science

ACHIEVEMENTS

2ndPlace — Datathon Competition

Prize: ₹3,000

- Applied preprocessing & XGBoost modeling for competitive accuracy

Member — GDG on Campus, PCCOE

- Organized technical events; gained coordination & community experience.

Smart India Hackathon Participant

- Built model analyzing public comments on policy amendments.

PROFILE

Second-year B.Tech student in AI&ML with hands-on experience building ML pipelines and NLP systems. Proficient in Python, PyTorch, and HuggingFace, with practical exposure to RAG architectures, hybrid retrieval, and data modeling. Active in technical communities; driven to apply modern AI concepts to real-world problems.

PROJECTS

RAG Chatbot with Hybrid Retrieval & Reranking

HuggingFace · Scikit-learn · Langchain

- Built RAG chatbot using two-stage retrieval pipeline.
- Combined BM25 (keyword) + cosine similarity (semantic) for improved matching.
- Applied cross-encoder reranking to sharpen result relevance, Used FIASS vectordata base

CampusKart — Student Resale E-Commerce Platform

HTML CSS JavaScript

- Developed responsive frontend using HTML, CSS, and JavaScript for seamless product browsing and listing management.
- Implemented dynamic product handling and user data management using MySQL database integration hosted on a local server environment.
- Designed core marketplace features including product listings, category filtering, search functionality, and user interaction workflows.

SentimentAnalysis—NEURATHON Hackathon

HuggingFace Transformers · BERT · PyTorch

- Fine-tuned bert-base-uncased for binary sentiment classification (positive/negative) on a policy comments dataset under hackathon time constraints
- Tokenized and preprocessed dataset using HuggingFace tokenizer; trained with AdamW optimizer at learning rate optimization
- Evaluated using accuracy and F1-score via custom HuggingFace Trainer API
